

BALANCING

SOUND

WITH ACOUSTICS

BRINGING ACOUSTICS HOME

SOUND IS THE
ENERGY THAT
MAKES A HOUSE
A HOME

SOUND IN MOTION

Sound is a constant presence in our lives. From a mother's voice to the sound of tiny feet on a kitchen floor or laughter among friends, pleasing sounds elevate our mood, and inspire us.

You build your home with comfort in mind. When it comes to the sounds in your life - an intimate dinner with friends or a movie night with the family - Kinetics helps to reduce extraneous noise and elevate desired sounds in your home.

Better Sound and Noise Control provides more:

PRIVACY

PEACE

PERFORMANCE

QUALITY OF SOUND

QUALITY OF LIFE

ACTIVE HOME LIVING

Sharing a home means accommodating different needs under the same roof. Kinetics has acoustic solutions to control the sounds and noises of active lifestyles to create well-balanced, controlled acoustical environments.

- TARGETED ACTIVITY AREAS
- FITNESS/EXERCISE ROOMS
- MEDIA/GAME ROOMS
- BOWLING ALLEYS
- HOME STUDIOS/INSTRUMENT ROOMS
- GYMNASIUMS/INDOOR POOLS

SOUND CONTROL

Sound Control - the noise you want to eliminate.
Kinetics products isolate the unwanted noise in one room and prevent it from transmitting to other areas in the home.

SOUND QUALITY

Sound Quality - the sounds you want to enhance.
Kinetics products acoustically absorb and balance sound levels within a noisy room.

PRIVACY BUILT-IN

Quiet homes contribute to harmonious living. Acoustic privacy starts with controlling the noise in a room by isolating it from the rest of the house. Installing Kinetics sound isolation products during the construction phase assures rest, relaxation, and a peaceful environment.

PRODUCT SPOTLIGHT

ISOMAX™

High-Value/Low-Cost. Noise transfers easily throughout the house because the walls, ceilings, and floors are all interconnected. An effective solution is IsoMax, which controls room-to-room noise by separating the drywall from joists and studs for remarkably quiet results.

FINE TUNE YOUR ROOM

When treating the sounds in your home, you also need materials that fit your style. As you fine tune your surroundings, Kinetics has the acoustical finishes that fit your life.

Kinetics acoustical panels offer a large range of finishes and colors. Choose your own image and showcase on Kinetics AcoustiGraphix™ panels or select our nearly invisible StretchTRAK. You can also create a refined space with Kinetics Acoustical Wood Collection. With Kinetics vast resources, the possibilities are endless.

PRODUCT SPOTLIGHT

ACOUSTICAL WOOD COLLECTION

ADD THE QUIET COMFORT OF ACOUSTICS TO THE WARMTH AND BEAUTY OF WOOD. KINETICS ACOUSTICAL WOOD COLLECTION COMES IN A VARIETY OF PATTERNS THAT, BENEATH THE SURFACE, ABSORB SOUND AND QUIET THE ROOM.

SOUNDS OF LIFE / A CLIENT STORY

Hard walls, cathedral ceilings, and other reflective surfaces contribute to an environment where listening – to family members, the television, friends – can be challenging.

One client developed an acute hearing sensitivity while serving our country. The noise levels in his great room and kitchen made it hard for him to communicate. He wanted a way to fix the problem and to enjoy his family and friends in this space.

SOLUTION

Our client needed a solution that would improve the room's acoustics without diminishing aesthetics. Kinetics staff performed a reverberation analysis to determine the proper treatment level. A *Stretch TRAK* system was installed on the ceiling by a Kinetics installation team. This controlled the echoes and reverberation in the room, while preserving the look and feel the client desired.

PRODUCT SPOTLIGHT

Stretch TRAK™

Stretch TRAK is a three-part system consisting of form-fit, flexible track, acoustical core, and fabric. Skilled installers deliver a finish with crisp corners and tight seams that virtually vanish into the interior décor.

PLANNING EQUALS PERFECTION

Great home theaters start with the detailed planning of the room. Even after every speaker is strategically located and the system is balanced, every room has acoustical challenges. Uncontrolled sound still reflects off the walls and ceiling, causing speech to be less intelligible and sound effects less defined.

Making acoustics an integral element of your room design elevates the lifelike performance of your system and allows the cinematic experience to overtake your senses.

COURTESY/ STATION EARTH

COURTESY/ PARADISE THEATER

DESIGNED FOR STYLE, ENGINEERED FOR SOUND

How your room looks when the lights are on is just as important as how it sounds when they are off. With Kinetics, the visual benefits are equally exciting. Our wide array of acoustical finishes allows almost any vision to be created.

Beneath the surfaces, Kinetics offers laboratory-tested acoustical panels and diffusers that attenuate specific frequencies for a more balanced acoustic performance.

THE KINETICS DIFFERENCE

USING NORMAL ACOUSTIC PRODUCTS IN MEDIA ROOMS AND HOME THEATERS LEAVES THE SPACE SOUNDING FLAT AND LIFELESS. THE PROPER APPROACH IS TO LOOK AT THE ROOM MATERIALS SUCH AS CARPET, SEATING, AND CURTAINS BEFORE DECIDING WHICH TYPE OF ABSORBERS ARE REQUIRED.

FINISHING TOUCHES

After the sound isolation materials and acoustic treatments are installed, Kinetics' certified installers complete the job by installing acoustical finishes that include acoustical wood, fabric, and a starfield ceiling.

Stretch TRAK is the ultimate in flexibility and beauty. Acoustical absorbers and diffusers disappear behind acoustically transparent fabric.

Starcoustix SX showcases the wonders of a celestial sky with outstanding acoustical

performance and special features that include shooting stars, constellations and night-sky images.

Starcoustix SX incorporates the Stretch TRAK system with customized starfield ceiling features and fabric, that runs the width of the ceiling for minimal seams and sections.

Acoustical Wood Collection adds distinction and acoustical performance to any home theater.
